# INTELLIGENT MOTOR CONTROL

## Motor Performance | Motor Protection

### FIXED SPEED CONTROL

Direct Online Starters

Low Voltage Soft Starters

Medium Voltage Soft Starters

### VARIABLE SPEED CONTROL

Low Voltage AC Drives

Medium Voltage AC Drives

#### PERFORMANCE

- Modular motor starter combinations for optimal configuration
- Full power range of soft starters with extended features

#### PROTECTION

- From basic devices to advanced electronic motor protection solutions
- Soft starters with embedded overload protection and advanced diagnostics

#### COMMUNICATION

- Utilisation of Rockwell Automation NetLinx open network architectures
- Distributed I/O devices for network communication
- Wide choice of communication modules for soft starters

#### PERFORMANCE

- Complete power range and flexible control for a broad range of AC motor applications
- Single point programming, assisted startup and maintenance
- Application specific features as standard

#### PROTECTION

- Integral motor protection and DriveGuard Safe-off functionality
- Multiple alarms for preventative maintenance
- Intelligent fault handling

#### COMMUNICATION

- Utilisation of Rockwell Automation NetLinx open network architectures
- Single software tool for seamless network integration and product configuration
- Support for 3rd party networks

## | System Wide Communication

### MOTION CONTROL

### ENGINEERED SOLUTIONS

Servo  
Drives

Servo  
Motors

Packaged  
Solutions

Engineered  
Drive Systems

Motor Control  
Centres

#### PERFORMANCE

- Integrated motor and drive matched solutions
- High-precision servo technology delivers ultimate machine performance
- Single point programming with pre-defined application parameters

#### PROTECTION

- Advanced diagnostic capabilities for preventive maintenance
- GuardMotion Safety functionality enhances machine productivity
- Smart Motor Technology utilised for intelligent fault handling and motor protection

#### COMMUNICATION

- Utilisation of Rockwell Automation NetLinx open network architecture
- Logix control architecture tightly coordinates an almost unlimited number of axes
- Single software tool for seamless network integration and product configuration
- Single SERCOS fibre-optic ring between control and drives greatly reduces wiring

#### PERFORMANCE

- Integrated and approved motor control solutions to specified application needs

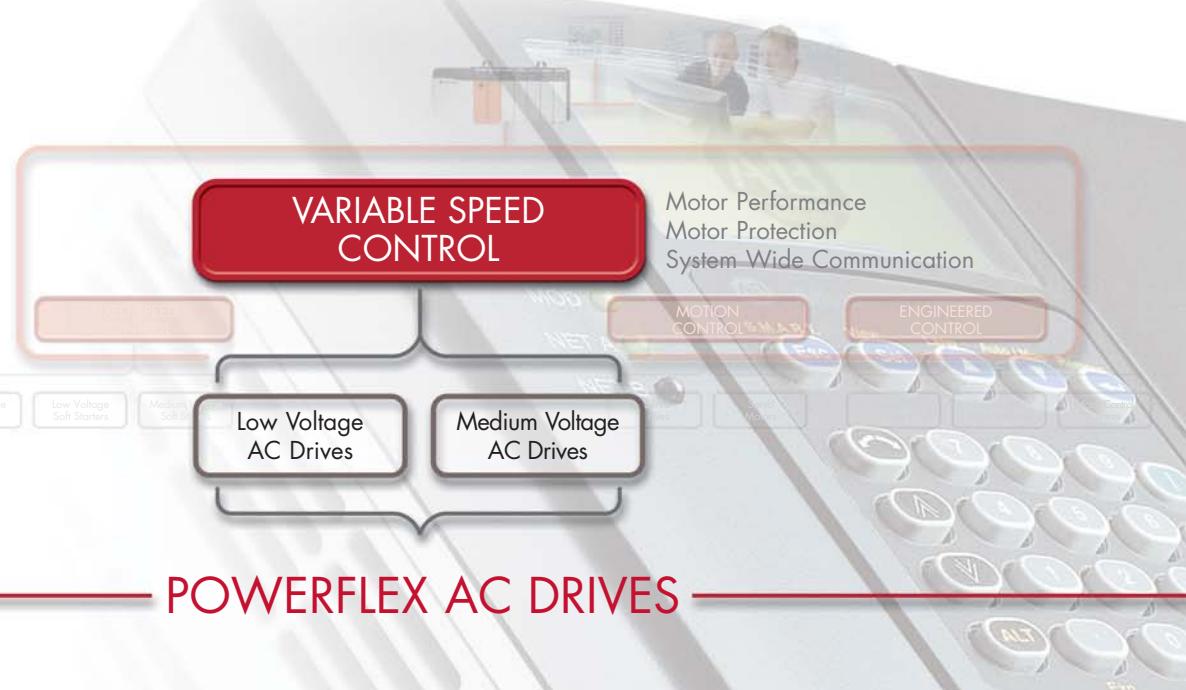

#### PROTECTION

- Tested system functionality for the protection of equipment and processes

#### COMMUNICATION

- Utilisation of Rockwell Automation NetLinx open network architecture
- Implementation of proven architectures with guaranteed network performance

# INTELLIGENT MOTOR CONTROL WITH POWERFLEX AC DRIVES

## POWERFLEX 4

0.25...2.2 kW @ 240V  
single phase

0.25...4 kW @ 400V  
3-phase

240V and 480V  
3-phase also available

V/Hz Control

## POWERFLEX 40

0.37...2.2 kW @ 240V  
single phase

0.37...11 kW @ 400V  
3-phase

240V, 480V and 600V  
3-phase also available

V/Hz and Sensorless  
Vector Control

## POWERFLEX 40P

0.37...11 kW @ 400V  
3-phase

240V, 480V and 600V  
3-phase also available

V/Hz and Sensorless  
Vector Control

Safe-off functionality to  
EN 954-1 Cat. 3

## POWERFLEX 400

0.37...110 kW @ 400V  
3-phase

240V and 480V  
3-phase also available

V/Hz Control

For industrial fan and  
pump applications

## POWERFLEX 70

0.37...37 kW @ 400V  
3-phase

240V, 480V and 600V  
3-phase also available

V/Hz, Sensorless Vector  
and Flux Vector Control -  
utilising FORCE  
Technology

IP 66 versions also  
available

Safe-off functionality to  
EN 954-1 Cat. 3

## POWERFUL PERFORMANCE FLEXIBLE CONTROL

### A complete range of PowerFlex frequency drives

There are two classes of Allen-Bradley drives for you to choose from, PowerFlex® Component Class Drives (PowerFlex 4 Class) offer you cost-effective motor control for machine-level and stand-alone applications, while PowerFlex® Architecture Class Drives (PowerFlex 7 Class) are designed for advanced application flexibility and control system integration. With power ratings from 0.25 kW single phase to 25 MW at medium voltage, standard control interface across the range and common setup for programming, monitoring and troubleshooting, PowerFlex drives offer you seamless integration into your control system however demanding your application.

### Seamless integration to maximise your uptime

To help you gain the most from your automation investment, PowerFlex drives utilise an open network architecture to integrate your manufacturing process allowing single point programming, advanced fault handling and visibility across your enterprise. PowerFlex AC drives provide common features and services for EtherNet/IP™, ControlNet™ and DeviceNet™, as well as supporting universal remote I/O, RS485, PROFIBUS™ DP, Interbus™, LonWorks® and Bluetooth® technology.

### Specific features for demanding applications

To meet your control needs the PowerFlex family offers a variety of motor control technologies, ranging from volts/hertz control for simple applications to vector control with FORCE™ technology for more demanding applications. With specific features as standard offered within the family; TorqProve™ for guaranteed control of a load in lifting and hoisting applications, Safe-off functionality for safety related applications certified to EN 954-1 Cat. 3, component class multi-drive connectivity for low cost networking and hi-end positioning control; the PowerFlex family can help you achieve the control you need. With additional features such as Zero-stacking, IP66 rated drives, liquid-cooled drives and drives with active front-end (AFE), the family can also help you reduce premium space and lower energy costs.

### POWERFLEX 700

0.75...132 kW @ 400V  
3-phase

45...132 kW @ 690V  
3-phase

240V, 480V and 600V  
3-phase also available

V/Hz, Sensorless Vector and Flux Vector Control - utilising FORCE Technology

TorqProve functionality with automated brake control

Liquid-cooled option with PowerFlex 700L

### POWERFLEX 700H

160...560 kW @ 400V  
3-phase

160...800 kW @ 690V  
3-phase

480V and 600V  
3-phase also available

V/Hz and Sensorless Vector Control

### POWERFLEX 700S

0.75...800 kW @ 400V  
3-phase

45...1100 kW @ 690V  
3-phase

240V, 480V and 600V  
3-phase also available

V/Hz, Sensorless Vector and Field Orientated Control - utilising FORCE Technology

Safe-off functionality to EN 954-1 Cat. 3

Liquid-cooled option with PowerFlex 700L

### POWERFLEX 7000

#### MEDIUM VOLTAGE AC DRIVES

150...930 kW @ 2400...6600V  
Air cooled, Frame A

150...4100 kW @ 2400...6600V  
Air cooled, Frame B

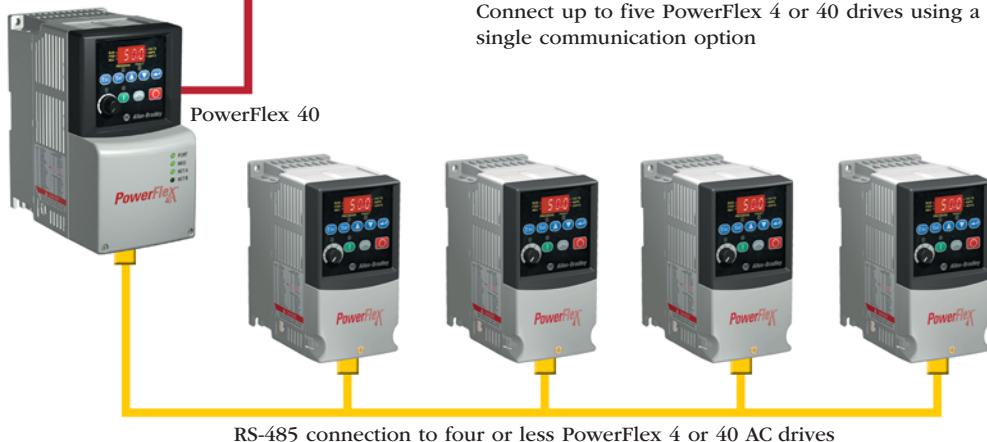

1300...6770 kW @ 2400...6600V  
Liquid cooled, Frame C

Synchronised drives option up to 25 MW with Frame C

## POWERFLEX 4 CLASS MULTI-DRIVE SOLUTION

EtherNet/IP, ControlNet, DeviceNet (NetLinx)  
plus 3rd party networks

Economical network solution on all networks  
Connect up to five PowerFlex 4 or 40 drives using a single communication option

## POWERFLEX 700 TORQPROVE

PowerFlex 700 with TorqProve™ allows motor torque and brake control and is ideal for lifting or hoisting applications. It guarantees load control even if the mechanical brake to the motor fails. This is achieved by maintaining torque to the motor while testing if the mechanical brake has engaged. If the brake has not engaged the PowerFlex 700 lowers the load in stages, monitoring at each stage engagement of the brake until the load comes to rest at a safe position.

- Automated torque and brake proving
  - Encoder-based
  - Encoderless (series B only)
- Float capability
  - Holds zero speed while holding brake open
- Micro position (creep speed)
- Fast Stop
  - Stops as fast as possible then sets brake (reduces wear)
- Digital input selections
  - Decel-Limit switches (normally closed)
  - End-of-Travel limit switches (normally closed)
- Assisted startup for lifting applications
- Optional torque pre-loads
- Protection capability including:
  - Load-based speed limits (allows fast speeds unloaded)
  - Brake slip detection
  - Speed deviation fault
  - Output phase loss detection
  - Encoder loss fault

## POWERFLEX 70 IP66 PROTECTION

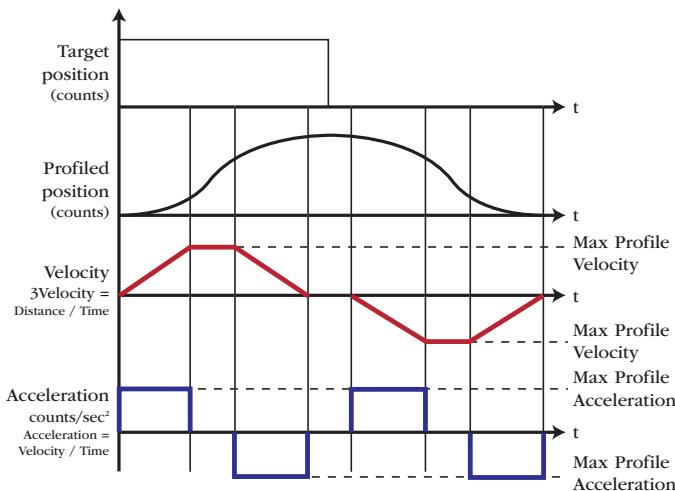

Suitable for use in harsh environments or hygiene sensitive environments such as food and beverage industry  
Resistant to corrosive chemicals, oils, dust...  
NSF (National Sanitation Foundation) certification insures conformity with international food equipment standard

## POWERFLEX SAFE-OFF

PowerFlex 40P, 70, 700H and 7008 AC drives are available with optional DriveGuard functionality offering Safe-off control. Ideal for safety related applications requiring removal of rotational power to the motor without shutting down the drive. DriveGuard with Safe-off functionality offers the benefit of quick start-up after a demand on the safety system, reduces drive wear from repetitive start-up and conforms to EN 954-1 Cat. 3.

## POWERFLEX POSITIONING

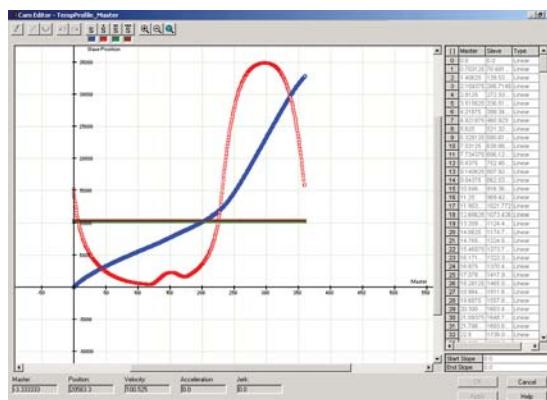

### Point-to-point move

One of the most commonly used profiles is the simple single-axes point-to-point move, which requires the position to which the axes needs to move. Often, it also requires the velocity and acceleration at which you want the motion move.

The position reference will be profiled within the limits of the profile generator (accel/decel and max. profile speed), fore the given position setpoint.

### Applications:

- Conveyor and belt (**PowerFlex 40P**)
- Material handling (**PowerFlex 700**)
- Lift and hoist (**PowerFlex 700**)

### Electronic Cam (PowerFlex 7008)

In various industrial applications, mechanical cams are used to create motion according to particular profiles, depending on a master position. The 'Electronic Cam Profile' function allows creating any type of non-linear motion profile between drive axes. One drive serves as the 'Master', the other the 'Slave' following the profile defined in the Cam relative to the motion of the 'Master'. The Cam reference is calculated with respect to reference or master position movements forcing a Cam profile table.

### Applications:

- Packaging machines
- Paper processing machines
- Printing machines
- Wood processing machines
- Material forming

- 0.25 kW...2.2 kW @ 240V single phase  
0.25...4 kW @ 400V 3-phase (240V and 480V 3-phase also available)
- V/Hz control
- Versions with and without integral dynamic brake chopper
- Integral RS 485 communication: allows multi-drop configurations (up to 4 additional PowerFlex 4 Class drives on one network node)
- Integral programming keypad and local LED status indication
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

## POWERFLEX 4 220...480V

Typical motor rating		Catalogue number	Input voltage	Output Amps (HD)			Dimensions HxWxD (mm)	Weight kg	Frame
kW	A			Cont.	1 min.	3 s

## POWERFLEX 4 OPTIONS

Catalogue No.	Description
<b>External EMC filter for up to 10 m motor cable length</b>	
22-RF9P5-AS	Short cable distance external filter, 9.5 A, used with 240V, 3-phase, Frame A
22-RF021-BS	Short cable distance external filter, 21 A, used with 240V, 3-phase, Frame B
22-RF5P7-AS	Short cable distance external filter, 5.7 A, used with 480V, Frame A
22-RF012-BS	Short cable distance external filter, 12 A, used with 480V, Frame B
<b>External EMC filter for up to 100 m motor cable length</b>	
22-RF010-AL	Long cable distance external filter, 10 A, used with 240V, single phase, Frame A
22-RF018-BL	Long cable distance external filter, 18 A, used with 240V, single phase, Frame B
22-RF9P5-AL	Long cable distance external filter, 9.5 A, used with 240V, 3-phase, Frame A
22-RF021-BL	Long cable distance external filter, 21 A, used with 240V, 3-phase, Frame B
22-RF5P7-AL	Long cable distance external filter, 5.7 A, used with 480V, 3-phase, Frame A
22-RF012-BL	Long cable distance external filter, 12 A, used with 480V, 3-phase, Frame B
<b>Human interface modules (HIM) &amp; accessories</b>	
22-HIM-C2S	LCD display, remote panel mount, CopyCat, IP66 HIM, includes 2.9 m cable
22-HIM-A3	LCD display, remote hand held, CopyCat, IP30 HIM, includes 1 m cable
22-HIM-B1	Bezel kit for 22-HIM-A3 panel mounting, includes 2 m cable
22-HIM-H10	DSI HIM to RJ45 Port cable 1 m
22-HIM-H30	DSI HIM to RJ45 Port cable 2.9 m
<b>Dynamic brake resistors - 5% duty cycle</b>	
AK-R2-091P500	Dynamic brake resistor, 200...480V, 91 Ω, 86 W
AK-R2-047P500	Dynamic brake resistor, 200...480V, 47 Ω, 166 W
AK-R2-360P500	Dynamic brake resistor, 200...480V, 360 Ω, 86 W
AK-R2-030P1K2	Dynamic brake resistor, 200...480V, 30 Ω, 260 W
AK-R2-120P1K2	Dynamic brake resistor, 200...480V, 120 Ω, 260 W

For detailed information on dynamic braking refer to publication: PFLEX-AT001...

For line reactors, circuit breakers and contactors please refer to page 28.

- 0.37...2.2 kW @ 240V single phase  
0.37...11 kW @ 400V 3-phase (240V and 480V also available)
- V/Hz and Sensorless Vector control
- Integral dynamic brake chopper
- Communication modules for industrial automation networks
- Integral RS 485 communication: allows multi-drop configurations (up to 4 additional PowerFlex 4 Class drives on one network node)
- Integral programming keypad and local LED status indication
- StepLogic with AND/OR and timer/counter functions
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

22-HIM-A3	LCD display, remote hand held, CopyCat, IP30 HIM, includes 1 m cable
22-HIM-B1	Bezel kit for 22-HIM-A3 panel mounting, includes 2 m cable
22-HIM-H10	DSI HIM to RJ45 Port cable 1 m
22-HIM-H30	DSI HIM to RJ45 Port cable 2.9 m
22-WIM-N1	Wireless interface module Bluetooth DSI, IP20
22-WIM-N4S	Wireless interface module Bluetooth DSI, IP66
<b>Dynamic brake resistors - 5% duty cycle</b>	
AK-R2-091P500	Dynamic brake resistor, 200...480V, 91 Ω, 86 W
AK-R2-047P500	Dynamic brake resistor, 200...480V, 47 Ω, 166 W
AK-R2-360P500	Dynamic brake resistor, 200...480V, 360 Ω, 86 W
AK-R2-030P1K2	Dynamic brake resistor, 200...480V, 30 Ω, 260 W
AK-R2-120P1K2	Dynamic brake resistor, 200...480V, 120 Ω, 260 W

For detailed information on dynamic braking refer to publication: PFLEX-AT001...

For line reactors, circuit breakers and contactors please refer to page 28.

Available communication modules are shown on page 26.

# POWERFLEX 40P

- 0.37...11 kW @ 400V 3-phase (240V and 480V also available)
- V/Hz and Sensorless Vector control
- Integral dynamic brake chopper
- Communication modules for industrial automation networks
- Integral RS 485 communication: allows multi-drop configurations (up to 4 additional PowerFlex 4 Class drives on one network node)
- Speed control with and without encoder feedback
- StepLogic with AND/OR and timer/counter functions
- Safe-off option conforming to EN 954-1 Cat. 3
- Specific features for fibre applications
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

## POWERFLEX 40P OPTIONS

Catalogue No.	Description
<b>External EMC filter for up to 10 m motor cable length</b>	
22-RF021-BS	Short cable distance external filter, 21 A, used with 240V, 3-phase, Frame B
22-RF034-CS	Short cable distance external filter, 34 A, used with 240V, 3-phase, Frame C
22-RF012-BS	Short cable distance external filter, 12 A, used with 480V, Frame B
22-RF018-CS	Short cable distance external filter, 18 A, used with 480V, Frame C
22-RF026-CS	Short cable distance external filter, 26 A, used with 480V, Frame C
<b>External EMC filter for up to 100 m motor cable length</b>	
22-RF018-BL	Long cable distance external filter, 18 A, used with 240V, single phase, Frame B
22-RF025-CL	Long cable distance external filter, 25 A, used with 240V, single phase, Frame C
22-RF021-BL	Long cable distance external filter, 21 A, used with 240V, 3-phase, Frame B
22-RF034-CL	Long cable distance external filter, 34 A, used with 240V, 3-phase, Frame C
22-RF012-BL	Long cable distance external filter, 12 A, used with 480V, 3-phase, Frame B
22-RF018-CL	Long cable distance external filter, 18 A, used with 480V, 3-phase, Frame C
22-RF026-CL	Long cable distance external filter, 26 A, used with 480V, 3-phase, Frame C
<b>Human interface modules (HIM) &amp; accessories</b>	
22-HIM-C2S	LCD display, remote panel mount, CopyCat, IP66 HIM, includes 2.9 m cable
22-HIM-A3	LCD display, remote hand held, CopyCat, IP30 HIM, includes 1 m cable
22-HIM-B1	Bezel kit for 22-HIM-A3 panel mounting, includes 2 m cable
22-HIM-H10	DSI HIM to RJ45 Port cable 1 m
22-HIM-H30	DSI HIM to RJ45 Port cable 2.9 m
22-WIM-N1	Wireless interface module Bluetooth DSI, IP20
22-WIM-N4S	Wireless interface module Bluetooth DSI, IP66
<b>Dynamic brake resistors - 5% duty cycle</b>	
AK-R2-091P500	Dynamic brake resistor, 200...480V, 91 Ω, 86 W
AK-R2-047P500	Dynamic brake resistor, 200...480V, 47 Ω, 166 W
AK-R2-360P500	Dynamic brake resistor, 200...480V, 360 Ω, 86 W
AK-R2-030P1K2	Dynamic brake resistor, 200...480V, 30 Ω, 260 W
AK-R2-120P1K2	Dynamic brake resistor, 200...480V, 120 Ω, 260 W
<b>Other options</b>	
20A-DG01	DriveGuard Safe-off board (Series B required)

For detailed information on dynamic braking refer to publication: PFLEX-AT001...

For line reactors, circuit breakers and contactors please refer to page 28.

Available communication modules are shown on page 26.

- 0.37...110 kW @ 400V 3-phase (240V and 480V 3-phase also available)
- V/Hz control
- For industrial pump and fan applications
- Integral dynamic brake chopper
- Communication modules for industrial automation networks
- Integral RS 485 communication: allows multi-drop configurations (up to 4 additional PowerFlex 4 Class drives on one network node)
- Integral programming keypad and local LED status indication
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

## POWERFLEX 400 OPTIONS

Catalogue No.	Description
<b>External EMC filters</b>	
22-RF018-CS	Short cable distance external filter, 18 A, used with 480V, 3-phase, Frame C
22-RF026-CS	Short cable distance external filter, 26 A, used with 480V, 3-phase, Frame C
22-RFD036	Long cable distance external filter, 36 A, used with 180...500V, 3-phase
22-RFD050	Long cable distance external filter, 50 A, used with 180...500V, 3-phase
22-RFD070	Long cable distance external filter, 70 A, used with 180...500V, 3-phase
22-RFD100	Long cable distance external filter, 100 A, used with 180...500V, 3-phase
22-RFD150	Long cable distance external filter, 150 A, used with 180...500V, 3-phase
22-RFD180	Long cable distance external filter, 180 A, used with 180...500V, 3-phase
22-RFD330	Long cable distance external filter, 330 A, used with 180...500V, 3-phase
<b>Human interface modules (HIM) &amp; accessories</b>	
22-HIM-C2S	Panel mount, IP66, full numeric LCD, cable 2.9 m
22-HIM-A3	Hand held, IP30, full numeric LCD, cable 1 m
22-HIM-B1	Bezel kit, IP20 for use with 22-HIM-A3
22-HIM-H10	DSI HIM cable, 1 m
22-HIM-H30	DSI HIM cable, 2.9 m
22-WIM-N1	Wireless interface module Bluetooth DSI, IP20
22-WIM-N4S	Wireless interface module Bluetooth DSI, IP66
<b>Other options</b>	
AK-U9-RLB1	Auxiliary relay board
22-JBAC	Conversion kit IP30 / NEMA 1 / UL Type 1 kit
22-JBCC	Conversion kit IP30 / NEMA 1 / UL Type 1 kit with communication option

For detailed information on dynamic braking refer to publication: PFLEX-AT001...

For line reactors, circuit breakers and contactors please refer to page 28.

Available communication modules are shown on page 26.

- 0.37...37 kW @ 400V 3-phase (240V, 480V and 600V, 3-phase also available)
- V/Hz, Sensorless Vector and Flux Vector control
- Speed and torque control with and without encoder feedback
- Communication modules for a wide range of industrial automation networks
- Small physical size, with in-built EMC filter and dynamic brake chopper
- IP66 stand alone and flange mount versions also available
- Optional multi-lingual LCD HIM with start-up assistance
- Safe-off option conforming to EN954-1 Cat. 3
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

## POWERFLEX 70 400V, IP20, WITH EMC FILTER

Typical motor rating		Catalogue number	Output Amps (ND)			Dimensions HxWxD (mm)	Weight kg	Frame

## POWERFLEX 70 OPTIONS

Catalogue No.	Description
<b>Human interface modules (HIM) &amp; accessories</b>	
20-HIM-A2	Human interface module, digital LCD
20-HIM-A3	Human interface module, full numeric LCD
20-HIM-A5	Human interface module, programming only LCD
20-HIM-B1	Human interface module, door mount bezel kit, IP20
20-HIM-C3S	Human interface module, full numeric LCD, IP66
20-HIM-C5S	Human interface module, programming only LCD, IP66
20-HIM-H10	Cable to allow remote use of HIM module 1 m
20-WIM-N1	Wireless interface module Bluetooth DPI, IP20
20-WIM-N4S	Wireless interface module Bluetooth DPI, IP66
<b>Internal dynamic brake resistors - 5% duty cycle</b>	
20AD-DB1-A	Brake resistor kit, PowerFlex 70 Frame A, 380...600V, 115 Ω
20AD-DB1-B	Brake resistor kit, PowerFlex 70 Frame B, 380...600V, 115 Ω
20AD-DB1-C	Brake resistor kit, PowerFlex 70 Frame C, 380...600V, 115 Ω
20AD-DB1-D	Brake resistor kit, PowerFlex 70 Frame D, 380...480V, 62 Ω
<b>Other options</b>	
20A-ENC-1	PowerFlex 70 encoder feedback interface 12/5V
20A-DG01	DriveGuard Safe-off board

For detailed information on dynamic braking refer to publication: PFLEX-AT001... and external brake resistors on page 32.

For line reactors, circuit breakers and contactors please refer to page 28.

Available communication modules are shown on page 26.

- 0.75...132 kW, 400V 3-phase, 45...132 kW, 690V 3-phase (240V, 480V and 600V 3-phase also available)
- V/Hz, Sensorless Vector and Flux Vector control
- Speed and torque control with and without encoder feedback
- Communication modules for a wide range of industrial automation networks
- Optional multi-lingual LCD HIM with start-up assistance
- Book-shelf housing with in-built EMC filter and dynamic brake chopper
- TorqProve for automated torque and brake control, ideal for lifting applications
- Parameter linking functionality
- Position regulator and 16 step indexing table (with encoder feedback)
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

## POWERFLEX 700 OPTIONS

Catalogue No.	Description
<b>Human interface modules (HIM) &amp; accessories</b>	
20-HIM-A2	Human interface module, digital LCD
20-HIM-A3	Human interface module, full numeric LCD
20-HIM-A5	Human interface module, programming only LCD
20-HIM-B1	Human interface module, door mount bezel kit, IP20
20-HIM-C3S	Human interface module, full numeric LCD, IP66
20-HIM-C5S	Human interface module, programming only LCD, IP66
20-HIM-H10	Cable to allow remote use of HIM module 1 m
20-WIM-N1	Wireless interface module Bluetooth DPI, IP20
20-WIM-N4S	Wireless interface module Bluetooth DPI, IP66
<b>Internal dynamic brake resistors - 5% duty cycle</b>	
20BD-DB1-0	Brake resistor kit, PowerFlex 700 Frame 0, 380...600V, 115 Ω
20BD-DB1-1	Brake resistor kit, PowerFlex 700 Frame 1, 380...600V, 115 Ω
20BD-DB1-2	Brake resistor kit, PowerFlex 700 Frame 2, 380...480V, 68 Ω
<b>Other options</b>	
20B-ENC-1	PowerFlex 700 encoder feedback interface 12/5V (Series B required)
20B-VECTB-C0	Upgrade kit, vector control, 24V I/O (Series A to B)

For detailed information on dynamic braking refer to publication: PFLEX-AT001... and external brake resistors on page 32.

For line reactors, circuit breakers and contactors please refer to page 28.

Available communication modules are shown on page 26.

POWERFLEX

700H

- 160...560 kW @ 400V 3-phase, 160...800 kW @ 690V 3-phase  
(480V and 600V 3-phase also available)
- V/Hz and Sensorless Vector control
- Communication modules for a wide range of industrial automation networks
- Optional multi-lingual LCD HIM with start-up assistance
- Rittal TS-8 floor standing cabinet
- Integrated line reactor
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)

20-WIM-N4S	Wireless interface module Bluetooth DPI, IP66

In-built AC line reactors.

Available communication modules are shown on page 26.

- 0.75...800 kW @ 400V 3-phase, 45...1100 kW @ 690V 3-phase (400V, 480V and 600V 3-phase also available)
- V/Hz, Sensorless Vector and Field Orientated Control - utilising FORCE Technology for both induction and permanent magnet motor control
- Communication modules for a wide range of industrial automation networks
- Integrated position loop for simple indexing to electronic line shaft applications
- SynchLink for high speed data transfer and synchronisation
- Multiple motor feedback options
- Embedded DriveLogix controller option providing programmability with RSLogix 5000
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)
- Zero-Stacking (no spacing required between drives)

# POWERFLEX 700S OPTIONS

Catalogue No.	Description
<b>Human interface modules (HIM) &amp; accessories</b>	
20-HIM-A2	Human interface module, digital LCD
20-HIM-A3	Human interface module, full numeric LCD
20-HIM-A5	Human interface module, programming only LCD
20-HIM-B1	Human interface module, door mount bezel kit, IP20
20-HIM-C3S	Human interface module, full numeric LCD, IP66
20-HIM-C5S	Human interface module, programming only LCD, IP66
20-HIM-H10	Cable to allow remote use of HIM module
20-WIM-N1	Wireless interface module Bluetooth DPI, IP20
20-WIM-N4S	Wireless interface module Bluetooth DPI, IP66
<b>Internal dynamic brake resistors - 5% duty cycle</b>	
20BD-DB1-0	Brake resistors kit, PowerFlex 700 Frame 0, 380-600V, 115 Ω
20BD-DB1-1	Brake resistors kit, PowerFlex 700 Frame 1, 380-600V, 115 Ω
20BD-DB1-2	Brake resistors kit, PowerFlex 700 Frame 2, 380-480V, 68 Ω
<b>Other options</b>	
20D-RES-A1	Feedback option card for resolver, 10-26V, 10kHz, 10-16 bit
20D-STEG-B1	Feedback option card for Stegmann, High Resol. Encoder, Hiperface, 8.5V DC, 20 bit, 100 k/r
20D-MDI-C1	Feedback option card Multi-device interface for Stegmann encoder or Temposonics linear sensor
20D-P2-ENCO	Feedback option card for 2nd incremental encoder, 5V or 12V configurable by the drive
20D-P2-DG01	DriveGuard Safe-off board with 2nd incremental encoder
20D-P2-SLBO	SynchLink option interface
20-24V-AUX1	Auxiliary power supply - 24V/300V DC (only for use with Frame 1...6)
20D-P2-CKE1	Upgrade kit: PowerFlex 700S phase II control
1403-CF001	2x1 m fibre link for power monitor/SynchLink
1403-CF003	2x3 m fibre link for power monitor/SynchLink
1403-CF005	2x51 m fibre link for power monitor/SynchLink
1403-CF010	10 m fibre link for power monitor/SynchLink
1403-CF020	20 m fibre link for power monitor/SynchLink
1403-CF050	50 m fibre link for power monitor/SynchLink
1403-CF100	100 m fibre link for power monitor/SynchLink
140-3CF250	250 m fibre link for power monitor/SynchLink
<b>DriveLogix5730 accessories</b>	
20D-DL2-CKE1	Upgrade kit: PowerFlex 700S DriveLogix 5730 phase II control
20D-DL2-ENETO	DriveLogix5730 embedded EtherNet/IP option
20D-DL2-LEBO	DriveLogix5730 expansion board for Compact Flash, Compact I/O, Daughter card (included when ordering Drive with catalogue number xxxCNK)
20D-DL2-CL3 *	Compact I/O left bus cable (1 m)
20D-DL2-CR3 *	Compact I/O right bus cable (1 m)
1788-CNC *	Daughter card ControlNet, single coax media connector
1788-CNCR *	Daughter card DriveLogix ControlNet, redundant coax media connector
1788-CNF *	Daughter card DriveLogix ControlNet, single fibre optic connector
1788-CNFR *	Daughter card DriveLogix ControlNet, redundant fibre optic connector
1788-DNBO *	Daughter card DriveLogix DeviceNet
1788-ENBT *	Daughter card DriveLogix EtherNet/IP
HL-1788-DPS *	Daughter card DriveLogix ProfiBus slave
HL-1788-DPM *	Daughter card DriveLogix ProfiBus master
1784-CF64 *	Compact flash card

For detailed information on dynamic braking refer to publication: PFLEX-AT001... and external brake resistors on page 32.

For line reactors, circuit breakers and contactors please refer to page 28. Available communication modules are shown on page 26.

\* Requires Logix expansion board (20D-DL2-LEBO)

- 370...715 kW @ 400V 3-phase, 355...657 kW @ 690V 3-phase  
(480V and 600V 3-phase also available)
- Control modes and functionality as PowerFlex 700 or 700S
- Typical configuration includes: Circuit breaker, L-C-L line filter, main contactor, active Front End (AFE) and inverter unit
- Cooling units such as heat exchangers and chillers are available as options
- Communication modules for a wide range of industrial automation networks
- SynchLink™ and DriveLogix functionality as PowerFlex 700S
- Active front end provides boosted DC-bus voltage for controlled motor voltage and power regeneration with harmonic mitigation
- Liquid-cooled power-stack allows compact drive size
- Programmable via DriveExplorer or DriveExecutive (1203-USB required)

Note: Tables above are for REFERENCE ONLY. Please contact your local Global Drive Systems representative to discuss your requirements

Contact your local Medium Voltage specialist to discuss your requirements

PowerFlex 7000 medium voltage drives can use Direct-to-Drive technology to eliminate the need for transformers while still mitigating harmonics and common-mode voltage. Transformerless drives save 30-50% of a drive system's size and 50-70% of the system's weight. They also save on capital, installation and maintenance costs – all using standard motor and cable insulation.

## POWERFLEX 7000 FRAME A

- Low end power range, 150-930 kW
- 2400 to 6600V nominal supply voltage ratings
- Air cooling
- Compact packaging for smallest footprint requirements
- Three input configurations for optimum installation flexibility:
  - 1) Base drive with provision for connecting to indoor or outdoor transformer
  - 2) Base drive with integral isolation transformer
  - 3) Base drive with integral line reactor and input starter
- Normal duty service rating  
(for variable torque loads, 110% overload for 1 minute every 10 minutes)
- Heavy duty service rating  
(for constant torque loads, 150% overload for 1 minute every 10 minutes)
- Two rectifier types:
  - 1) PWM rectifier (active front end) for low line harmonics, high power factor and commonality of parts
  - 2) Basic 6 pulse rectifier for the lowest cost solution
- Three cables in / three cables out for lower installation costs

## POWERFLEX 7000 FRAME B

---

- Low and Medium power range, 150-4100 kW
- 2400 to 6600V nominal supply voltage ratings
- Air cooling
- Small footprint for medium power range
- Normal duty service rating  
(for variable torque loads, 110% overload for 1 minute every 10 minutes)
- Heavy duty service rating  
(for constant torque loads, 150% overload for 1 minute every 10 minutes)
- Three rectifier types:
  - 1) PWM rectifier (active front end) for low line harmonics, high power factor and commonality of parts
  - 2) 18 Pulse rectifier for low line harmonics and connection to a high voltage distribution system
  - 3) Basic 6 pulse rectifier for the lowest cost solution
- Three cables in / three cables out (6 pulse and PWM rectifier)
- Nine cables in / three cables out (18 pulse rectifier)

## POWERFLEX 7000 FRAME C

---

- High end power range, 1300-6770 kW  
(Parallel drive option with up to 4 drives for 25 MW)
- 2400 to 6600V nominal supply voltage ratings
- Closed loop liquid cooling system with liquid to air or liquid to liquid style heat exchangers
- Small integrated package for high end power range
- Normal duty service rating  
(for variable torque loads, 110% overload for 1 minute every 10 minutes)
- Heavy duty service rating  
(for constant torque loads, 150% overload for 1 minute every 10 minutes)
- Two rectifier types:
  - 1) PWM rectifier (active front end) for low line harmonics, high power factor and commonality of parts
  - 2) 18 Pulse rectifier for low line harmonics and connection to a high voltage distribution system
- Three cables in / three cables out (6 pulse and PWM rectifier)
- Nine cables in / three cables out (18 pulse rectifier)

- Human Interface Modules (HIM) for local drive configuration and/or operation, incorporate start-up procedures and parameter backup (copycat)
- DriveExplorer – entry level software with wizards for online parameter editing and backup
- DriveTools SP – Software suite for demanding user requirements, on-line or off-line operation via RSLinx. Comprises:
  - DriveExecutive – for parameter configuration, up/download and diagnostics.
  - DriveObserver – scope tool for charting multiple drive parameters over time.
- Extensive range of communication modules

## POWERFLEX HUMAN INTERFACE MODULES (HIM)

Catalogue No.	Description
<b>PowerFlex 4, 40, 40P, 400 HIM's</b>	
22-HIM-A3	LCD display with full keypad
22-HIM-C2	Remote panel mount HIM with full keypad and IP66 protection
22-WIM-N1	Wireless Interface Module Bluetooth DSI, IP20
22-WIM-N4S	Wireless Interface Module Bluetooth DSI, IP66
<b>PowerFlex 70, 700, 700H, 700S, 700L, 7000 HIM's</b>	
20-HIM-A2	LCD display with digital keypad
20-HIM-A3	LCD with full keypad
20-HIM-A5	LCD programmer
20-HIM-C3S	Remote panel mount HIM with full keypad and IP66 protection
20-HIM-C5S	Remote panel mount programmer only with IP66 protection
20-HIM-B1	Door mount bezel for LCD displays
20-WIM-N1	Wireless Interface Module Bluetooth DPI, IP20
20-WIM-N4S	Wireless Interface Module Bluetooth DPI, IP66

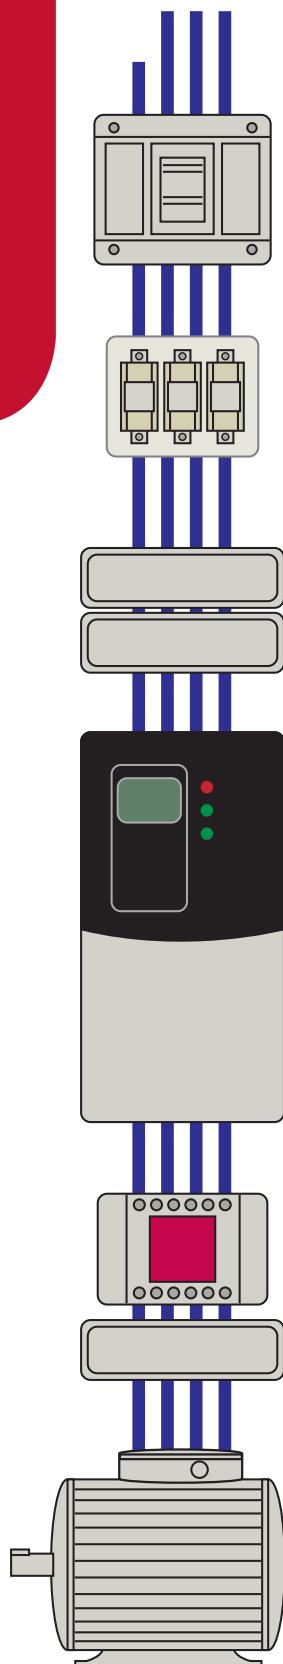

## POWERFLEX PROGRAMMING SOFTWARE

Catalogue No.	Description
<b>PowerFlex programming software</b>	
9306-4EXP02ENE	DriveExplorer version 5.x
9306-4XPX01ENE	PocketDrive Explorer
9303-4DTE01ENE	DriveExecutive version 4.x
9303-4DTS01ENE	DriveTools SP suite - includes DriveExecutive and DriveObserver

## POWERFLEX COMMUNICATION MODULES

Catalogue No.	Description
<b>PowerFlex 40, 40P, 400</b>	
22-COMM-E	EtherNet/IP communication module
22-COMM-C	ControlNet Coax communications module
22-COMM-D	DeviceNet communications module
22-COMM-P	Profibus DP communication module
22-COMM-L	LonWorks communication module
22-COMM-B	BacNet communication module
22B-CCB	Communications cover (required when adding communication modules to PowerFlex 40/40P Frame B)
22B-CCC	Communications cover (required when adding communication modules to PowerFlex 40/40P Frame C)
22-XCOMM-DC-BASE	External communications power bases
1203-USB	USB to DPI/DSI converter kit (PC to Drive communication, including cables and DriveExplorer Lite)
AK-U0-RJ45-SC1	RJ45 one to two port splitter cable
AK-U0-RJ45-TR1	RJ45 120 OHM terminator resistors (2 pieces)
AK-U0-RJ45-TB2P	RJ45 two positions terminal block
1769-SM 2	Compact Logix to DSI interface
<b>PowerFlex 70, 700, 700H, 700S, 700L, 7000</b>	
20-COMM-E	EtherNet/IP communication module
20-COMM-C	ControlNet Coax communications module
20-COMM-Q	ControlNet Fibre communications module
20-COMM-D	DeviceNet communications module
20-COMM-P	Profibus DP communication module
20-COMM-H	HVAC communication module with 3 selectable protocols for Modbus RTU, Johnson Controls Metasys N2, Siemens Building Technologies P1
20-COMM-I	InterBus communication module
20-COMM-L	LonWorks communication module
20-COMM-R	Remote I/O communications module
20-COMM-S	Serial communication module RS485 DF1
20-COMM-K	CANopen communications module
20-COMM-B	BacNet communication module
20-XCOMM-DC-BASE	External communications power bases
20-XCOMM-AC-PS1	AC to DC power converter plug for XCOMM-DC
20-XCOMM-IO-OPT1	I/O option for 20-XCOMM
1203-USB	USB to DPI/DSI converter kit (PC to Drive communication, including cables and DriveExplorer Lite)
1769-SM 1	Compact Logix to DPI interface

## Typical drive application

### AC supply source

Input line reactor recommended when line voltage imbalances are greater than 2%

### Input fusing and circuit breakers

See listings in appendix A of the product user manuals.  
Recommended circuit breakers are listed on page 29.

### Line reactor

Needs to be applied if:

- Installation site has switched power factor correction capacitors.
- Installation site has power interruptions or voltage dips.
- The transformer is too large in comparison to the drive  
(refer to publication: DRIVES-IN001...).

### Input filter

PowerFlex 4 Class drives: External EMC filter required for guaranteed EMC compliance (refer to product sections in this document).

PowerFlex 7 Class drives: External EMC filter only required with long motor cables and/or domestic installations (refer to External EMC filters on page 30).

### AC drive

Normal duty (ND) rating: 110% overload for 1 minute and 150% overload for 3 seconds. No excessive starting overload, transient overload or high duty cycle. The majority of typical AC drive applications are ND.

Heavy duty (HD) rating: 150% overload for 1 minute and 200% overload for 3 seconds. Required for high starting torque (eg: heavily loaded conveyors), high brake-away torque (eg: extruders and mixers) and high running torque (eg: reciprocating compressors).

### Output device or cable termination

Required if motor cable lengths exceed stated values  
(refer to publication: DRIVES-IN001...).

### AC motor

Needs to be designed for PWM control.

## POWERFLEX APPLICATION EXAMPLES

Application	Typical requirements	Primary offering
	<b>Water pump</b> <ul style="list-style-type: none"> <li>• Single motor 37 kW</li> <li>• Building installation</li> <li>• Local operator station</li> <li>• Remote diagnostics</li> </ul>	PowerFlex 70 (ND) IP66 Remote HIM Ethernet/IP adaptor
	<b>Roller conveyor</b> <ul style="list-style-type: none"> <li>• Single motor 7.5 kW</li> <li>• Simple network</li> <li>• Space restrictions</li> </ul>	PowerFlex 40 (ND) Integral Modbus RTU Small footprint  Alternative: PowerFlex 700
	<b>Overland conveyor</b> <ul style="list-style-type: none"> <li>• Existing motors 132 kW</li> <li>• Inclination</li> <li>• Start under heavy load</li> </ul>	Primary offering: PowerFlex 700H 300 A (ND) / 245 A (HD)  Ask for motor cable length!
	<b>Conveyor</b> <ul style="list-style-type: none"> <li>• Multiple motors 2.2 kW</li> <li>• Safe stand-still</li> <li>• Existing DeviceNet</li> </ul>	PowerFlex 40P DriveGuard™ option DeviceNet interface  Alternative: PowerFlex 70
	<b>Extruder</b> <ul style="list-style-type: none"> <li>• Single motor 15 kW</li> <li>• Existing Profibus network</li> <li>• On-machine solution</li> </ul>	PowerFlex 70 IP66 version 37 A (ND) / 30 A (HD) Profibus adaptor
	<b>Warehouse lift</b> <ul style="list-style-type: none"> <li>• Single gear motor 4 kW</li> <li>• Position indexing</li> <li>• Rugged feedback device</li> </ul>	PowerFlex 700 (HD) Encoder feedback card Integral dynamic brake Brake resistor required
	<b>Car wash</b> <ul style="list-style-type: none"> <li>• Multiple motors 0.75..4 kW</li> <li>• Braking capability</li> </ul>	PowerFlex 4 Brake version! Simple, economic product Brake resistors required

- Line reactor (typically 3%) needs to be applied if:
  - a) Installation site has switched power factor correction capacitors.
  - b) Installation site has power interruptions or voltage dips.
  - c) The transformer is too large in comparison to the drive  
(refer to publication: DRIVES-IN001...).
- Circuit breakers and input contactors.

Further information on ratings can be found in PowerFlex User Manuals.

*Note: Recommended Circuit Breakers and Contactors in the following tables are based on IEC standards and therefore may differ to user manuals where UL standards may be referenced.*

- The 140M provides Type 2 coordination between the circuit breaker and contactor at 50 kA
- 100 – C coil connections can be top or bottom position on contactor
- 140M circuit breaker has a «trip position» incorporated within the handle
- For higher kW ratings please refer to the user manuals.

- PowerFlex 7 Class AC drives meet the requirements of EN 61800-3 for industrial installations up to 30 m screened motor cable (PowerFlex 70 EC up to 40 m).
- For longer motor cables or installations on public distribution networks, external EMC filters need to be installed according to the following tables.
- The drives must be installed and grounded as outlined in the Installation Manual (publication: DRIVES-IN001...).

### MAXIMUM MOTOR CABLE LENGTH EN61800-3

	6		150 m	50 m	N/A	N/A

\* Jumper for disconnecting the common mode capacitor (open jumper).

Use of these filters assumes that the drive is mounted in an EMC enclosure.

#### IEC 61800-3 defines sale or distribution to two levels of customer competence:

"Unrestricted distribution is a mode of sales distribution in which the supply of equipment is not dependent on the EMC competence of the customer or user for the application of drives."

"Restricted distribution is a mode of sales distribution in which the manufacturer restricts the supply of equipment to suppliers, customers or users who separately or jointly have technical competence in the EMC requirements of the application of drives."

- ① At 40°C ambient temperature
- The filters also have a 40°C rating. In some cases it will be possible to select a smaller filter.
- All filters are cUL listed
- For Frame 9 and above for PowerFlex 700H and 700S filters please use recommended Schaffner FN 3359 with relevant Amps ratings.
- Additional information: [www.deltron-emcon.com](http://www.deltron-emcon.com) | [www.schaffner.com](http://www.schaffner.com)

- External brake resistors are required to increase the braking capability of a drive
- Use the following tables to verify that the resistance of a selected brake resistor is greater than the minimum value stated in the table below.

## POWERFLEX MINIMUM BRAKE RESISTORS

Drive rating Normal duty (ND)	Motor kW	Minimum resistance $\Omega$				
		PF4	PF40/40P	PF400	PF70	PF700/S
400...480V, 0.37 kW	0.37				68	
400...480V, 0.75 kW	0.75	121	97		68	71
400...480V, 1.5 kW	1.5	121	97		68	69

Duty cycle	100%	50%	25%	15%	3%
Overload factor	1	1.8	3	4	12

- kW listed above are for 100% duty cycle. For lower duty cycles use following factors in table above.
- FZxxx = wire wound resistor; FGxxx = steel grid resistor
- UL listed versions are also available

Catalogue number	Description
AK-R2-091P500	Dynamic brake resistor, 200...480V, 91 Ω, 86 W
AK-R2-047P500	Dynamic brake resistor, 200...480V, 47 Ω, 166 W
AK-R2-360P500	Dynamic brake resistor, 200...480V, 360 Ω, 86 W
AK-R2-030P1K2	Dynamic brake resistor, 200...480V, 30 Ω, 260 W
AK-R2-120P1K2	Dynamic brake resistor, 200...480V, 120 Ω, 260 W

- Duty cycle listed is based on full speed to zero speed deceleration. For constant regeneration at full speed, duty cycle capability is half of what is listed.  
Application Type 1 represents maximum capability up to 100% braking torque where possible.  
Application Type 2 represents more than 100% braking torque where possible, up to maximum of 150%.

- The resistors are CE and cUL certified
- \* For 11 and 15 kW normal duty external resistor applications, use two 7.5 kW size resistors wired in parallel.

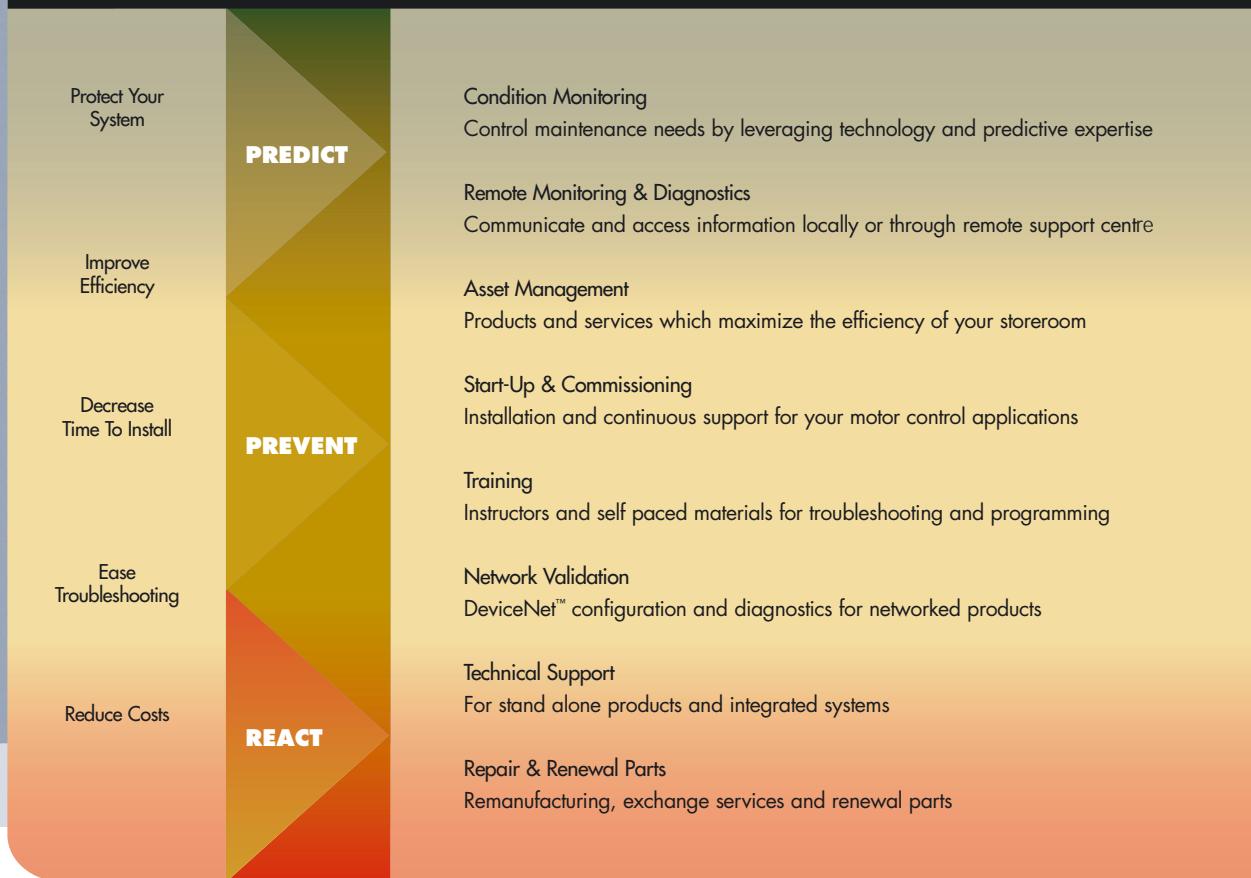

## SUPPORT AND MAINTAIN YOUR INVESTMENT

You can maximize the life of your investment by aligning your Intelligent Motor Control solutions with a strategic approach to maintenance. By including the right combination of predictive, preventive and reactive methods and Rockwell Automation® Services & Support, you can get the most out of your automation assets.

### For More Information

For more information about Rockwell Automation® Services and Support go to [www.rockwellautomation.com/services](http://www.rockwellautomation.com/services). To learn which other Rockwell Automation Services and Support will be most beneficial to your maintenance strategy, contact your local authorised Allen-Bradley distributor or Rockwell Automation sales office.
